

How to check if an operating system is licensed:

Step 1: right-click on the “**Start**” button and select “**Terminal**” (or “**Windows PowerShell**”, or “**Command prompt**”):

Step 2: once the “**Terminal**” is open, enter the following command with a space in the middle:
slmgr /dli

Step 3: press the “**Enter**” key. If everything is entered correctly, a window displaying the activation status will appear:

Step 4: capture a full screenshot of the screen, including the window displaying the activation status and send it to us over an email. To take a screenshot, please press the 'Prt Scr' button or use the key combination “**Windows + Shift + S**” and capture the entire screen.
